EDITORIAL

WITH the publication of this volume, the *Record* achieves its century. Its fortunes have varied over the years but despite all difficulties and even during two world wars, a volume has been published annually. It is an interesting indication of the growth of zoology, that the first volume, which dealt with the literature published during 1864, contained 634 pages while the present volume totals 1,925 pages and will now have to be bound in three parts. The volume has been so divided that Vol. 100 A contains the sections dealing with Comprehensive Zoology and the Invertebrata other than the Arthropoda, Vol. 100 B deals with the Arthropoda and Vol. 100 C, the Chordata and the list of new genera and subgenera.

Each year it is our pleasure to thank those zoologists who give so generously of their time in order that the *Record* may be produced. Few users of the *Record* may realize that to compile a Section listing some 3,000–4,000 papers, the recorder must read and abstract an average of ten papers every single day throughout the year, and this work must be carried out in his leisure hours. The Society is most grateful to all those who so willingly undertake this task.

It will greatly assist in the production and ensure the inclusion of the titles of books and articles in the Record if authors will forward a copy of their paper or memoir to the Editor of the Zoological Record, The Zoological Society of London, Regent's Park, London, N.W.1. In the case of separately printed copies of articles so forwarded the original pagination should be given.
